

AERB conducted Public Outreach program in the vicinity of Tarapur Atomic Power Station on April 13, 2022

AERB conducted public outreach programme at the Grampanchayat office of Ghivali, Kudan and Kurgaon villages on April 13, 2022. These villages are located in the Palghar district of Maharashtra and close to the Tarapur Atomic Power Station.

The objective of the programme was to disseminate information on AERB's regulatory mechanism for ensuring safe operation of nuclear power plants and its role in the preparedness for any nuclear or radiological emergency.

Members of Grampanchayat, Gramsevaks, Grampanchayat staff and teachers of zilla parishad school participated in the programmes.

During the programme, AERB officers assured the existence of regulatory framework for ensuring safety in the nuclear power plant operations, multifarious applications of ionising radiation sources for societal benefits and thus ensuring radiation safety of occupational workers, public and the environment. The interactions were mostly in regional language. AERB officers answered the related queries of participants.

AERB also provided its Organisation brochure for information to general public visiting the offices of Grampanchayat. The programme was interactive and well received by the participants.
