

AERB conducted Public Outreach program in the vicinity of Kaiga Generating Station on June 03, 2022

AERB conducted public outreach programme at Kadra, Mallapur and Chittakula villages on June 3, 2022. These villages are located in Karwar Taluka, Uttara Kannada district of Karnataka and close to the Kaiga Generating Station (KGS).

The objective of the programme was to disseminate information on AERB's regulatory mechanism for ensuring safe operation of nuclear power plants and its role in the preparedness for any nuclear or radiological emergency.

Staff members of Grampanchayats, students and teachers of schools participated in the programmes.

AERB provided an information brochure to officials of Grampanchayats and schools. The programme was interactive and well received by the participants.
