

# **AERB Colloquium**

**[October 24, 2019]**

---

**Topic :** Statute of the IAEA and its functioning

**Speaker:** Shri Deepak Ojha, SO/H, DRA&C

IAEA is recognized "as an autonomous international organization in the working relationship with the United Nations and as the organization established for the specific purpose of dealing with the peaceful uses of atomic energy. Its mandate and work revolves around promoting science and technology, promoting safety and security, and safeguards and verification. The talk elaborated about the historical perspective of IAEA, the global and Indian context, various international conventions in the field, the processes that lead to the development of instruments related to atomic energy and the functions of various departments of IAEA.
